Fatema Begum

Software Engineering Student | Aspiring Software Developer

Bangladesh | 01884611361
GitHub: github.com/fatema1361 | LinkedIn | Codeforces | HackerRank

PROFILE

Software Engineering student at Noakhali Science and Technology University (NSTU) with a growing foundation in programming, frontend web development, and problem-solving. Practicing C/C++ and competitive programming while building small web projects and strengthening JavaScript and React skills. Seeking opportunities to learn, contribute, and grow as a software developer.

EDUCATION

B.Sc. in Software Engineering
Noakhali Science and Technology University (NSTU), Bangladesh
First-semester CGPA: 3.44

Expected Graduation
2028

TECHNICAL SKILLS

Programming: C, C++, Python (beginner)
Framework: React (beginner)
Problem Solving: Competitive programming; arrays, strings, and introductory data structures/algorithms

Web: HTML5, CSS3, Tailwind CSS, JavaScript, DOM
Tools: Git, GitHub, VS Code

PROJECTS

English Janala — English-learning web project built with frontend web technologies. [Repository]

Tea House — Responsive landing-page project focused on layout and styling. [Repository]

Influencer Gears — Product showcase website project practicing page structure and responsive styling. [Repository]

G3 Architects — Architecture-themed website project practicing HTML/CSS layout. [Repository]

C++ Problem Solving — Collection of C++ solutions and programming practice. [Repository]

COMPETITIVE PROGRAMMING

Practicing problem-solving through Codeforces and CodeChef; working to improve algorithmic thinking, implementation skills, and consistency in contests.

ADDITIONAL

Interested in frontend development, APIs, React, and building practical software projects. Currently developing skills through independent practice and university coursework.
